SKILL

- Good Skilled with backend PHP.
- Comfortable with fronted end HTML,CSS, React js JAVASCRIPT,JQUERY, BOOTSTRAP
- Comfortable with SQL server
- Basic Skilled with JAVA programming language .
- Basic Skilled with C++ programming Language .
- Skilled with PYTHON programming Language .
- Basic Skilled with MATLAB programming Language
- Comfortable with Word and PowerPoint , Excel.
- skilled in Linux commands
- Basic Skilled with Bash scripting language

LANGUAGES

- Arabic :native
- English :good

Noor Abdul Salam shaker

Bachelor of information & communication Engineering

EDUCATION

[University of Baghdad /college of AL Khwarizmi Engineering /information and communications Eng. Dept .]

[2020] – [2023]

PROJECTS

[Online book store]

A store [website with SQL](#) integration is an e-commerce platform that enables businesses to sell products online and manage their inventory using a SQL database.

[performance ofdm in energy detection and cyclostationary detection in cognitive radio for spectrum sensing]

Cognitive radio is a technology that enables the efficient utilization of the radio spectrum by allowing secondary users (SUs) to access the unused spectrum bands, The use of [\(python\)](#) in conjunction with OFDM-based spectrum sensing enhances the performance of cognitive radio systems by improving the accuracy and efficiency of detecting the availability of spectrum bands for opportunistic usage. It allows SUs to effectively access the spectrum while maintaining interference avoidance with PUs.

[Performance of energy detection spectrum sensing in cognitive radio.]

The performance of energy detection spectrum sensing in cognitive radio in [Matlab code](#) can be evaluated in different channel conditions, In AWGN channels, the received signal consists of the desired signal and background noise. In Rayleigh fading channels, the received signal experiences multipath fading due to the random nature of the channel.

CERTIFCATES

- The completion HTML and CSS 3, React js.
- The completion Bash language.
